VIDEOS: PIC Math unlocks opportunities beyond the classroom

Developing a strong skillset in the mathematical sciences isn't just a good idea for your future - it can actually help solve major real-world problems. The PIC Math program is aiming to increase awareness among mathematical sciences faculty and students about non-academic career options, provide research experience working on real problems, and prepare students for industrial careers. Visit PICMath.org and watch the short case study videos to see how industry professionals are innovatively applying their mathematical knowledge in their careers.
